Est

Accountability Chart

ESTABLISHED MERCH · VERSION 1.2

September 24, 2026
9 people · 4 major functions · no open seats
Draft for discussion — not announced

THE SEATS

Visionary — Luke `G W C ✓`

The seat he should end up in, alone.

1. Own the V/TO — vision, 10-year target, 3-year picture
2. Culture and the core value — ***WE GIVE A DAMN***
3. Big relationships: top accounts, Seafoam, Carrie, Jeff, SanMar / S&S
4. Capital and equipment decisions
5. New revenue — find the next lever before the current one flattens

Integrator — Luke today · Clint 2028 `W ✗ C ✗`

Clint is gated on Customer Success being backfilled first.

1. Run the L10 and the Rock process
2. Hold the leadership five accountable to the Scorecard
3. Harmonize sales and production — what is promised can be made when promised
4. Remove obstacles; resolve issues between functions
5. Own the P&L against plan

Sales & Marketing — Luke today · Carrie target `W ~ C ✗`

1. Own the revenue number
2. Own pricing matrices and quote accuracy
3. Direct the ad spend and the agency
4. Build and defend the top accounts
5. Own retention and reorder rate — the largest number in the business

Pre-Press & Art — Richie `G W C ✓`

The only clean GWC pass on the chart. Art is the industry's number-one failure point — a major function, not a support job.

1. Art in, print-ready out — owns the whole path
2. ***Screens burned and racked for the next day's schedule, before he leaves***
3. Customer proofs and approvals to a stated turnaround
4. Embroidery digitizing sourced and QC'd
5. Manage GXS as capacity — route, spec, QC, escalate

Operations & Production — Justin `W ?`

Owns the press directly — no lead-printer seat. Owns goods and staging as an outcome, with the authority to assign it across the crew.

1. The day runs to the schedule — open through shutdown
2. ***Goods received, counted in and staged by order before they are needed***
3. On-time delivery
4. Quality — owns the misprint number
5. ***Calls print-or-stage for the last hour at the morning meeting*** — and directs who covers what

Press Operator — Tom · Jerry `G W C ?`

One role definition, held separately by two people. Each is individually accountable to the same standard — this is not a shared seat.

1. Print the day's scheduled volume to standard
2. ***When printing stops, stage the next day's goods. This is part of the shift, not extra.***
3. Own their own misprint count
4. Screens off press to reclaim; press left ready for the next setup
5. Raise a problem to the Production Lead before it becomes a late job

Finance & Admin — Luke `W ✗ C ✗`

1. Cash — AR collection, AP timing, the account stays positive
2. Books current, closed monthly
3. Payroll run and compliance
4. HR — onboarding, handbook, safety
5. Vendor accounts and terms

Goods, Hours & Authority

HOW TO READ THIS

A SEAT

Five accountabilities with a name on them. Two people may hold the **same** role — as the press operators do — but each is individually accountable. What never happens is one job split between two people with neither owning it.

GWC

Gets it · **W**ants it · **C**apacity for it. All three must be true or the seat is not truly filled. Dashed badges fail today.

OWNING VS DOING

The name on a seat owns the **outcome.** It does not mean that person does every hour of the work themselves. Hours can be shared; accountability cannot.

THE DIAGNOSIS

IT IS NOT A HEADCOUNT PROBLEM. IT IS A SIMULTANEITY PROBLEM.

Justin cannot direct the floor, catch at the dryer and QC count-ins ***at the same moment.*** Kim cannot leave the dryer at 10:30 for UPS. Richie can carry the box in but cannot own it — he is gone at 1pm. Production averages 30 hours a week: ***the hours exist, they are just not available when the work demands them.***

THE CHANGE — THE OPEN SEAT IS CLOSED, NOT FILLED

WHY WE ARE NOT HIRING SHIPPING & RECEIVING YET

There is not a full-time job here at today's volume. Hiring into it would drop a new person into ***the same low-hour trap the crew is already in***, and people looking for full-time work do not stay in part-time work. If the workload cannot support the position but the duties can be covered by hours we already pay for and do not use, **we use the hours first.** The seat gets created when the hours run out, not before.

WHO	WHAT CHANGES
Justin	Owns goods and staging as an **outcome**, with the authority to assign it. Calls print-or-stage for the last hour at the morning meeting. Escalates when it cannot be covered — he does not absorb it silently.
Tom & Jerry	**Staging is part of the job, not an offer of hours.** Print the volume the day allows, then stage the next day's goods. Same shift, one job description.
Kim	Count-ins and next-day staging once dryer and reclaim work is done.
Richie	Owns screens burned and racked for the next day's schedule before he leaves. Now one of his five.
Receiving itself	Roughly ten minutes when UPS lands. A process note — whoever is here signs for the truck — not a seat.

SAY THE AUTHORITY OUT LOUD, ONCE, TO EVERYONE

Justin has the latitude to assign staging and to expect a meaningful contribution. That only works if the crew hears it ***from Luke, in the room*** — otherwise Justin is asserting authority he was granted privately, against two people with more tenure. Two minutes at a morning meeting. It becomes the shop's rule, not Justin's opinion.

And the standard behind it is the core value, not a preference: ***someone who will not carry the last hour of their own paid shift is telling you they do not give a damn.***

THE LAST-HOUR CALL IS MADE IN THE MORNING, NOT AT 2:55

Justin knows before printing ends whether staging help will be needed. So he calls it ***at the morning meeting*** — today the last hour is print, or the last hour is stage.

Nobody minds staging at 2:00 if they knew at 8:00. Being sprung on at 2:55 is what makes people dig in. Predictable beats fair-in-theory.

Scorecard candidate: days the last-hour call was made at the huddle vs. sprung late. Target 100%.

Triggers, Questions & Sequence

THE NEW HIRING TRIGGER — HOURS, NOT PERCENTAGES

CREATE THE GOODS & STAGING SEAT WHEN ALL THREE ARE TRUE

- **The crew is at or near 40 hours** for three consecutive weeks, and
- **staging is still running behind** — goods not laid out before the job is scheduled to run, and
- the Printavo sweep shows **0 fetch failures**, so the load numbers behind it are complete.

This replaces the old 80%-of-capacity trigger. It measures the thing that actually decides it: ***whether the unused hours have run out.***

CORE PROCESS #1 — IN USE, NEVER WRITTEN DOWN

COUNT-IN STANDARD

Jobs **under 300 pieces** — counted in to the exact piece.
Jobs **300 and over** — counted in against the packing slip.

Staging is constrained by floor space, not clock time: tomorrow's goods cannot be laid out while today's are still down. So it runs as a ***flow*** — as each job leaves for press, the space it frees takes the next one.

THREE OPEN QUESTIONS

QUESTION	WHY IT IS STILL OPEN
Does Justin want the Operations seat?	Never asked. Richie was assumed into Production Manager and failed on Wants It; the same mistake is queued up here.
Do Tom and Jerry share the core value?	The prediction that they will not pick up hours outside their lane has never been tested — and it is the difference between a scheduling constraint and a People Analyzer conversation.
Does Richie accept Pre-Press & Art as a promotion?	A move up into a major function, not a demotion out of production. Sequencing interacts with the GXS rollout.

THE SEQUENCE OUT

WHEN	MOVE	LUKE EXITS
Q4 2026	Carrie takes Sales with her book attached	Sales & Marketing — keeps top-account defense only
Q1–Q2 2027	Goods & Staging seat created when the hours run out	Operations fully real; Luke stops being the escalation path
H2 2027	Bookkeeper or expanded admin absorbs AR/AP and close	Finance & Admin → oversight only
2028	Clint to Integrator, once Customer Success is backfilled	**Integrator — Luke is Visionary only**

STANDING RISK

Step one depends entirely on Carrie, who is deliberately excluded from the baseline forecast. If she does not land, the sequence slips a year and Luke stays in four seats through 2027.

RULES THIS CHART IS HELD TO

- **Every seat has exactly one name.** A person may hold several seats. A seat never holds several people. Hours can be shared; accountability cannot.
- **Structure first, people second.** Draw the seats the business needs at $3MM, then add names.
- **Any headcount change triggers a same-week chart review.** Ian left, Kim arrived, three seats drifted — because nobody redrew this.
- **Rocks belong to the leadership five. Scorecard numbers belong to everyone** — reported by the person who owns them, out loud, in the meeting they attend.

Changed in v1.2: Press Operator added as a named role with its own five accountabilities — staging is part of the job, not an offer of hours · Justin given explicit authority to assign it · print-or-stage called at the morning meeting · hiring trigger measured against the whole crew's hours. **Still open:** does Justin want the Operations seat · does Richie accept Pre-Press & Art as a promotion.
