Est

Accountability Chart

ESTABLISHED MERCH · VERSION 1.0

September 23, 2026
9 people · 4 major functions
Draft for discussion — not announced

THE SEATS

Visionary — Luke `G W C ✓`

The seat he should end up in, alone.

1. Own the V/TO — vision, 10-year target, 3-year picture
2. Culture and the core value — ***WE GIVE A DAMN***
3. Big relationships: top accounts, Seafoam, Carrie, Jeff, SanMar / S&S
4. Capital and equipment decisions
5. New revenue — find the next lever before the current one flattens

Integrator — Luke today · Clint 2028 `W ✗ C ✗`

Clint is gated on Customer Success being backfilled first.

1. Run the L10 and the Rock process
2. Hold the leadership five accountable to the Scorecard
3. Harmonize sales and production — what is promised can be made when promised
4. Remove obstacles; resolve issues between functions
5. Own the P&L against plan

Sales & Marketing — Luke today · Carrie target `W ~ C ✗`

1. Own the revenue number
2. Own pricing matrices and quote accuracy
3. Direct the ad spend and the agency
4. Build and defend the top accounts
5. Own retention and reorder rate — the largest number in the business

Pre-Press & Art — Richie `G W C ✓`

The only clean GWC pass on the chart. Art is the industry's number-one failure point — a major function, not a support job.

1. Art in, print-ready out — owns the whole path
2. Separations and screen development to standard
3. Customer proofs and approvals to a stated turnaround
4. Embroidery digitizing sourced and QC'd
5. Manage GXS as capacity — route, spec, QC, escalate

Operations & Production — Justin `W ? C ✗`

Conditional. Owns the press directly — there is no lead-printer seat; Tom and Jerry are equals inside this one.

1. The day runs to the schedule — open through shutdown
2. On-time delivery
3. Quality — owns the misprint number
4. Takes the handoff at the morning meeting and runs the floor from it
5. Trains and develops the crew

Finance & Admin — Luke `W ✗ C ✗`

1. Cash — AR collection, AP timing, the account stays positive
2. Books current, closed monthly
3. Payroll run and compliance
4. HR — onboarding, handbook, safety
5. Vendor accounts and terms

HOW TO READ THIS

A SEAT	GWC	AN OPEN SEAT
Five accountabilities with **one name on them.** Not a title, not a person — someone can hold several seats while we are small.	**G**ets it · **W**ants it · **C**apacity for it. All three must be true or the seat is not truly filled. Dashed badges fail today.	Work we need that nobody owns. It stays drawn so it cannot be quietly absorbed by whoever is most willing.

Gaps, Triggers & Sequence

THE DIAGNOSIS

IT IS NOT A HEADCOUNT PROBLEM. IT IS A SIMULTANEITY PROBLEM.

Justin cannot direct the floor, catch at the dryer and QC count-ins ***at the same moment.*** Kim cannot leave the dryer at 10:30 for UPS. Richie can carry the box in but cannot own what happens to it, because he is gone at 1pm.

Production averages 30 hours a week. ***The hours exist. They are not available when the work demands them.*** Every seat failing Capacity on this chart is failing the same way.

THE FOUR GAPS

GAP	WHAT IT IS	WHAT CLOSES IT
Luke in 4 of 6 top seats	Visionary, Integrator, Sales & Marketing, Finance & Admin. The system exists to fix this.	The sequence below. Sales goes first.
Three unasked questions	Richie was assumed into Production Manager and failed on Wants It. Justin is queued for the same. Tom and Jerry are pre-excluded from helping on a prediction.	Ask. Do not forecast the answer.
Justin fails Capacity	Cannot run the floor while also catching, expediting and doing count-ins. QC is what gets dropped — that is the misprint spike.	The S&R seat
Flex sits on two people	All flexible hours land on Justin and Kim. Tom and Jerry have the same 30-hour slack and are outside the pool by assumption.	A People Analyzer conversation, not a schedule

SHIPPING & RECEIVING — TWO JOBS, WRONGLY GLUED TOGETHER

JOB	WHEN	DURATION	NEEDS
Receiving	Locked — UPS lands 10–11am	~10 min	Anyone with hands. A process note, not a seat.
Count-in, staging, kitting	**Not locked to anything**	Can run all day when busy	One owner. Dedicated, detail-oriented eyes.

THE REAL CONSTRAINT IS FLOOR SPACE, NOT CLOCK TIME

Tomorrow's goods cannot be laid out while today's are still down. So staging a day ahead is not a batch job moved to 4pm — it is a ***flow***: as each job leaves for press, the space it frees takes tomorrow's job. Partial by design.

THE S&R TRIGGER — WRITTEN, NOT WISHED

HIRE WHEN BOTH ARE TRUE

- The screen print lane exceeds **80% of daily capacity for three consecutive weeks** on the Printavo block sweep, **and**
- The sweep reports **0 fetch failures** across those weeks — an incomplete load number does not count.

Measured automatically off the production calendar. Ties the most expensive decision of next year to a number nobody can fudge.

CORE PROCESS #1 — ALREADY IN USE, NEVER WRITTEN DOWN

COUNT-IN STANDARD

Jobs **under 300 pieces** — counted in to the exact piece.
Jobs **300 and over** — counted in against the packing slip.

This standard exists today and lives in one person's head. It is the first entry in the Core Process Log, and it is three months of a new hire's mistakes avoided.

THE SEQUENCE OUT — FOUR SEATS TO ONE

WHEN	MOVE	LUKE EXITS
Q4 2026	Carrie takes Sales with her book attached	Sales & Marketing — keeps top-account defense only
Q1–Q2 2027	S&R filled on trigger; Justin's capacity clears	Operations becomes real; Luke stops being the escalation path
H2 2027	Bookkeeper or expanded admin absorbs AR/AP and close	Finance & Admin → oversight only
2028	Clint to Integrator, once Customer Success is backfilled	**Integrator — Luke is Visionary only**

STANDING RISK

Step one depends entirely on Carrie, and Carrie is deliberately excluded from the baseline forecast. If she does not land, the sequence slips a year and Luke stays in four seats through 2027.

RULES THIS CHART IS HELD TO

- **Every seat has exactly one name.** A person may hold several seats. A seat never holds several people.
- **Structure first, people second.** Draw the seats the business needs at $3MM, then put names in.
- **Any headcount change triggers a same-week chart review.** Ian left, Kim arrived, and three seats drifted because nobody redrew this.
- **Rocks belong to the leadership five. Scorecard numbers belong to everyone** — reported by the person who owns them, out loud, in the meeting they attend.

Open — cannot be resolved on paper: does Justin want the Operations seat · do Tom and Jerry share the core value · does Richie accept Pre-Press & Art as a promotion into a major function.
