ACCOUNTABILITY CHART

One seat. One owner. Three to five accountabilities. · VERSION 3.0 · Q4 2026 · OWNER: LUKE BLIGH

If a seat has two owners, nobody owns it. If a person sits in three seats, the business has three holes.

Hours can be shared. Accountability cannot. The name on a seat owns the OUTCOME — not every hour of the work.

SALES / MARKETING · OPS — PLANNER · OPS — EXECUTIONER · FINANCE / ADMIN

Colour says which of the four major functions a seat rolls into — not which row it sits on.

FULFILMENT & RECLAIM
Kim ✓✓✓
Reclaim · catching · count-in

NO OPEN SEATS. Shipping & Receiving was removed as a hire and folded into Operations as Goods & Staging.

Trigger to re-open it: crew at or near 40 hrs for 3 consecutive weeks + staging still behind + block sweep showing 0 fetch failures.

SEAT DEFINITIONS

GWC: Gets it · Wants it · Capacity for it. All three, or the seat is not truly filled.

VISIONARY · Luke Bligh — G✓ W✓ C✓

The seat he should end up in, alone.

- 10-year vision, 3-year picture, strategic positioning
- Capital allocation — major investment, hiring, ad spend
- Culture and the core value — WE GIVE A DAMN — lived, not posted
- Top-client and strategic vendor relationships — Seafoam, SanMar, S&S, Carrie
- New revenue — find the next lever before the current one flattens

INTEGRATOR · Luke Bligh (interim) — W✗ C✗

Clint is the 2028 candidate. Gated on Customer Success being backfilled first.

- Runs the weekly Leadership L10 and the Rock process
- Holds the leadership five accountable to the Scorecard
- Harmonizes sales and production — what is promised can be made when promised
- Removes obstacles and resolves issues that cross seat boundaries
- Owns the company P&L against plan

SALES / MARKETING · Luke → Carrie (target) — W~ C✗

- Owns the revenue number
- Owns the pricing matrices and quote accuracy
- Directs ad spend and the agency
- Builds and defends the top accounts
- Owns retention and reorder rate — the largest number in the business

CUSTOMER SUCCESS · Clint — G✓ W✓ C✓

Was Sales. The seat changed; the Scorecard has not caught up until now.

- Inbound lead handling — first response, qualification, sundown rule
- Quote building for inbound, reorders and non-sales-driven deals
- Proactive customer communication during production — 100% of approved orders
- Issue resolution end-to-end; ONLY CX clears ORDER ON HOLD, and only after the customer has been told
- Reorder triggering — relationship-based, not an email automation

OPS — PLANNER · Richie — G✓ W? C✓

THE WEEK. Art is the industry's number-one failure point — this is a major function, not a support job.

- Art in, print-ready out — owns the whole path
- Screens burned and racked for the NEXT DAY'S schedule before he leaves
- Builds the weekly production plan off the Printavo calendar and makes the overload calls
- Customer proofs and approvals to a stated turnaround

- Manages GxS and the art partners as CAPACITY — routes, specs, QCs, escalates
- MEASURED BY: Monday Overload Count = 0 and Next-Day Screens Ready = 5 of 5. Review Nov 3.

OPS — EXECUTIONER · Justin

G✓ W?

THE DAY. Owns the press directly — there is no lead-printer seat. Owns goods and staging as an outcome, with authority to assign it.

- The day runs to the schedule — open through shutdown
- Goods received, counted in and staged by order before they are needed
- On-time delivery
- Quality — owns the misprint number
- Calls print-or-stage for the last hour at the morning meeting, and directs who covers what

PRINT PRODUCTION · Tom · Jerry

G✓ W✓ C✓

One role definition, held separately by two people. Staging and count-in CONFIRMED with both, Sept 2026.

- Print the day's scheduled volume to standard
- When printing stops, stage the next day's goods — part of the shift, not extra
- Own their own misprint count
- Screens off press to reclaim; press left ready for the next setup
- Raise a problem to the Executioner before it becomes a late job

EMB & DTF PRODUCTION · Bryan

G✓ W✓ C✓

At 37.1 hrs/week — effectively full. No capacity to absorb another function.

- Embroidery production to standard — sews per hour against the stitch band
- DTF pressing and transfer ordering
- Sew-out approvals; a declined sew-out is a digitizing fault until proven otherwise
- Machine maintenance for EMB and the DTF press
- Own the combined EMB + DTF weekly output number

FULFILMENT & RECLAIM · Kim

G✓ W✓ C✓

Hired part-time to reclaim. Has grown into catching and reclaiming without being asked.

- Screen reclaim and prep
- Catching at the dryer
- Count-ins and next-day staging once dryer and reclaim work is done
- Folding, bagging, boxing to standard
- Own her own count-out accuracy — out must match in

FINANCE / ADMIN · Luke (Mechelle · S. Roman)

W✗ C✗

- Cash — AR collection, AP timing, the account stays positive
- Order entry, sourcing and bill pay — Mechelle
- Books current and closed monthly — S. Roman, outsourced
- Payroll run and compliance
- HR — onboarding, handbook, safety

LUKE'S EXIT PLAN

#	Seat	Path out	Target
1	**Sales / Marketing**	Carrie takes Sales with her book attached. Luke keeps top-account defence only.	**Q4 2026**
2	**Operations**	Goods & Staging seat created when the unused crew hours run out. Luke stops being the escalation path.	**Q1–Q2 2027**
3	**Finance / Admin**	Bookkeeper or expanded admin absorbs AR/AP and close. Luke moves to oversight only.	**H2 2027**
4	**Integrator**	Clint, once Customer Success is backfilled. PATH A (Richie earns it) IS CLOSED.	**2028**

STANDING RISK: step one depends entirely on Carrie, who is deliberately excluded from the baseline forecast.

If she does not land, the sequence slips a year and Luke stays in four seats through 2027.

OPEN — CANNOT BE RESOLVED ON PAPER

1. Does Justin want the OPS — Executioner seat? Never asked.
2. Does Richie accept OPS — Planner as a promotion, and will he build the weekly plan? Two prior attempts failed on Wants It. Now has a measurable and a Nov 3 review.

CLOSED Sept 2026: the crew was asked directly about staging and count-in. Tom, Jerry and Kim are on board, for the right reasons.

That was the third assumption in this engagement that needed testing. It tested TRUE. The other two are above, still untested.

CORE PROCESS #1 — in use, never written down: jobs UNDER 300 pieces counted to the exact piece; 300 AND OVER counted against the packing slip.

Staging is constrained by FLOOR SPACE, not clock time — it runs as a flow; as each job leaves for press, the space it frees takes the next one.
